FIRE EVACUATION DIAGRAMS

Evacuation Diagrams include

- **YOU ARE HERE** location
- **Diagram rotations, oriented to be accurately installed on a North, South, East or West wall**
- **Designated exits doors**
- **Paths of egress from the building**
- **EWIS WIP Phones, manual and emergency call points**
- **Fire hose reels, hydrants, fire extinguishers and fire blankets as applicable**
- **Automatic smoke detection panels**
- **Appropriate legend**
- **Evacuation diagram validity date**
- **Emergency assembly points**
- **First Aid Kits**
- **Gas Supply Valves**
- **Electrical Switch rooms and boards**
- **RACE or site specific evacuation instructions**

The purpose of evacuation diagrams is to help facilitate effective and informed evacuation of staff, clients and any other building occupants in the event of an emergency, ensuring sound building orientation, exits and evacuation routes and a designated emergency assembly area.

Survival Solutions can undertake the complete design including on-site assessment, mark up and installation or we can use yours to help to produce complete evacuation diagrams thus reducing cost.

Evacuation diagrams are designed in accordance with Australian Standard AS 3745:2010
